## Locations

Multiple Locations

## Project Type

Tenant Finish  
Office

Jonkman Construction has had the pleasure of constructing more than 1 million square feet of Class A tenant finish work for a multitude of clients. Each project is unique with special circumstances and challenges resulting in diverse solutions to project approach and execution. Many of the tenant finish projects have been woven into existing multi-story structures, challenging Jonkman Construction to ensure that neighboring tenants are well taken care of and not disrupted throughout the new construction process. Jonkman Construction's work with tenants continues to meet budget and expectation throughout construction. They take great pride in this teaming process.

With Class A results as the showcase, Jonkman Construction's tenant finish resume continues to expand into Class B and Warehouse Leasing. Their resources and capabilities for low cost, high value finishes fits any classification perfectly. While primarily utilizing design/build processes for tenant finish projects, Jonkman Construction also welcomes traditional and tested development methods with a focus on team approach.
