

908 West 25th Street / Hanna Rubber Company

Location

Kansas City, Missouri

Project Type

Industrial

Working together with Karbank Real Estate Company, Jonkman Construction fully renovated the 908 W 25th Street Building into a modern and dynamic flex space. The work quickly caught the eye of America's first choice for rubber and plastic products, Hanna Rubber. The prime 31,100 square foot corner location on highly trafficked Southwest Boulevard in Kansas City, Missouri sits just steps away from the famous Boulevard Brewing Company. Jonkman Construction worked with Hanna Rubber to complete the interior build out of office and warehouse space transforming the building into the official headquarters for Hanna Rubber.

The impact of the improvements on the surrounding area are priceless. The Prodema architectural wood panels warm the industrial exterior while the modern rain screens, imported from Spain, blanket the entire facade. The fully renovated building includes replacement of all exterior glazing, new dock doors and supporting equipment and infrastructure.

- **2010 Capstone Award (industrial)**
