

Modern Culinary

Location

Mission Woods, Kansas

Project Type

Restaurant
Event Space

Modern Culinary is the newest addition to the prestigious Restaurant at 1900. Located on the first floor inside the 1900 Building at 1900 Shawnee Mission Parkway, this custom-designed 2,225 square foot multi-use culinary space includes a catering and full-service show kitchen with a demonstration area for hosting and filming culinary-related events as well as an exclusive private dining room.

Wood Indoteak pennyround mosaic tile accents the show cooking island, while 3D Boho Tear white wall tile provides a modern look to compliment the contemporary cooking experience. The ceilings reveal the exposed historical structure of the 1900 Building, while Turf acoustical beam baffles provide beautiful accents while finely balancing the acoustic tones of the space. Jonkman Construction is proud to have completed another amazing and successful dining project with partners Karbank Real Estate & Perspective Architecture + Design.
